

Loka — V1 Wireframe Structure

1. Design Direction

Product Feel

Loka should feel:

- Calm
- Civic
- Trustworthy
- Structured
- Minimal

Avoid:

- Bright entertainment-style UI
 - Infinite-scroll addiction patterns
 - Viral engagement styling
 - Overloaded screens
-

2. Design System Foundation

Typography

Headings

Bold, clean, highly readable.

Body Text

Simple readable sans-serif.

Participation Actions

Clear visual distinction between:

- Support
- Oppose

Avoid emotional colors.

Spacing

Use generous spacing.

Loka should feel deliberate, not crowded.

Card Philosophy

Issue cards should prioritize: 1. Clarity 2. Context 3. Participation visibility 4. Status visibility

Not entertainment.

3. App Navigation

Bottom Navigation

Tab	Purpose
Home	Main civic feed
Search	Discover issues
Create	Create issue
Notifications	Participation updates
Profile	Citizen identity & participation

4. Splash Screen

Layout

Centered:

- Loka logo
- Tagline

Bottom:

- Loading indicator
-

Suggested Tagline

"One Citizen. One Voice."

5. Visitor Home Screen

Header

- Current region
- Search shortcut

Feed Sections

Nearby Issues

Primary local feed.

New Issues

Chronological issues.

Community Priority

High participation issues.

Resolved Issues

Completed civic outcomes.

6. Issue Card Wireframe

[] | Water Supply Disruption | | MVP Colony, Vizag | | Water • Active | | | Support: 214 | | Oppose: 18 | | Evidence: 12 | | | Last Activity: 2h ago | []

Card Rules

- No profile popularity
 - No follower counts
 - No reaction emojis
 - No engagement bait
-

7. Issue Detail Screen

Layout Order

Header

- Title
 - Status
 - Location
 - Category
-

Problem Description

Structured readable content.

Desired Outcome

Clearly separated section.

Large structured text area.

Desired Outcome

Separate focused text area.

Evidence Upload

- Photos
 - Videos
 - Documents
-

Submission Area

Submit Button → Duplicate Detection → Final Confirmation

11. Search Screen

Search Inputs

- Keyword
 - District
 - Category
 - Status
-

Search Results

Use same issue-card structure.

12. Notifications Screen

Notification Examples

- Issue approved

- Clarification requested
- Issue resolved
- Participation received
- Appeal reviewed

Notifications should remain informational.

13. Profile Screen

Visitor State

- Become a Citizen
 - About Loka
 - Policies
 - Settings
-

Verified Citizen State

- Verification badge
 - Home District
 - Living-In District
 - My Issues
 - My Participation
 - Account Settings
-

14. Become Citizen Flow

Introduction & privacy explanation.

Step 2

Upload Aadhaar Offline XML.

Step 3

Enter Share Code.

Step 4

Verification processing.

Step 5

Select districts.

Step 6

Verification completed.

15. Moderator Dashboard

Dashboard Sections

- Pending Review
- Clarification Queue
- Published Issues
- Rejected Issues
- Appeals
- Audit Logs

16. Moderation Review Layout

Location | Evidence Preview | Similar Issues | | [Approve] [Reject] | [Merge] [Clarify] |

17. Empty States

Examples:

- No issues nearby
- No notifications
- No participation yet

Empty states should encourage constructive participation.

18. Error Handling Philosophy

Messages should:

- Remain calm
- Be understandable
- Avoid technical jargon

Examples: "Verification unsuccessful. Please review your uploaded file and try again."

19. Accessibility Direction

- High readability
 - Large tap areas
 - Screen-reader compatibility
 - Local language readiness
 - Reduced visual clutter
-

20. UI Development Principle

The interface should reinforce:

- accountability
- clarity
- thoughtful participation
- civic seriousness

The interface should never encourage impulsive outrage behavior.
